

WESTERTON ACCESS

WHO WE ARE

Westerton Access is a division of Westerton UK Ltd which was formed in 1997. Since then, Westerton UK has become a leading specialist providing downhole cutting and consultancy services to the global Oil & Gas Industry.

Westerton Access provides specialist inspection, maintenance and integrity services to the energy market. Westerton Access creates innovative solutions and services by ensuring focus is on delivering excellence with the least disruption to client operation. The Westerton Access experienced management team are dedicated to providing a quality and client driven service.

At Westerton Access, we pride ourselves on employing a highly effective workforce with specialist skills and experience. We believe that the people working for Westerton Access are the most valuable asset. Their commitment, professionalism, experience and support help us provide quality and high performance throughout our service line.

SERVICES

Inspection & Certification

Dropped Object Services

Rig Evaluation Services

Project & Fabric Maintenance Services

ROV Services

INSPECTION & CERTIFICATION

Westerton Access will carry out inspections to standards agreed with our client, incorporating industry standards such as LOLER or API.

- Rope Access Inspection
- Drilling Derrick & Mast Inspection
- Hoisting, Handling and Rotary Drilling Tool Inspection
- NDT Services (inc. MPI, UT, Eddy Current, Dye Pen)
- LOLER Lifting Equipment Inspection and Testing
- Leg Inspections
- Corrosion Assessment
- SPS & UWILD Services
- Wind Farm Inspection & Maintenance

Westerton Access provide detailed photographic reports for all inspection services performed. These reports are provided in hard copy as well as being available through the Westerton Access online reporting portal where clients can access, interact and follow up critical data at any given time.

Westerton Access recognise that every asset is different and therefore our work scope and reports for each inspection are tailored to meet our client's specific need.

DROPPED OBJECT SERVICES

RIG EVALUATION SERVICES

Objects falling from height continue to be a common cause of accident offshore and Westerton Access is dedicated to helping to reduce this.

- ADAPT Dropped Object Prevention
- Dropped Object Surveys, Audits & System Evaluations
- Drop Net Survey (Supply and Installation)
- Barricading Survey (Supply and Installation)

The Westerton Access ADAPT dropped object prevention program is a tool that will walk our clients through regular internal inspections between third party surveys. The program is designed to improve safety by tackling the human factors that may result in dropped objects. The program acts as a training and development tool, while at the same time provides complete visibility of all routine dropped object inspections/checks to management.

Westerton Access offer a range of specialist services designed to assist with the rig selection and contract award process.

- Rig Condition Assessments
- New Build & Rig Reactivation Acceptance Surveys
- Management & Control System Assessments
- Mechanical & Electrical Rig Equipment Audit
- Rig Structure And Integrity Assessment
